

1. Go to menu Settings of your Android smartphone.

2. At Settings menu at Wireless and Networks section click at More... button or Networks.

3. Click at Mobile Networks.

4. Click at Access Point Names.

If there is no APN, create new APN by clicking at menu button (see bellow).

5.Fill with information bellow:

**a/ If you are using normal businessim card:**

APN: send.ee

Username: your number Businessim (3725...) without 00 or + in front

Password leave empty

-----

**b/ If you are using SUPER DATA Businessim card**

APN: apn

Username leave empty

Password leave empty

-----

6.Save the new APN.

7.Enable the Data Connection

**And you are ready**
